◆The 747 P Fixed Reel Trailer Jet and the 747-PR Rotating Reel Trailer Jet combine features and price to be the leader in the 350 gallon trailer jet market.◆

Power Plant - Our quality starts with the Caterpillar® diesel engine, AutoClutch™ automotive style clutch, and high quality FMC Technologies® triplex pump.

One Piece Shroud protects the pump & engine compartment. The shroud is available in corrosion resistant Aluminum or Painted Steel. The shroud and all Series II sub-assemblies are pre-painted before assembly to assure the maximum corrosion resistance.

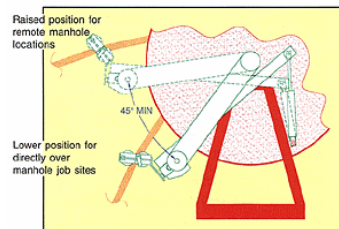

Strong Frame is built with 2" x 6" outer frame heavy gauge steel tubing with 2" x 4" spine running beneath the reel and water tanks. Our frame with our 7,000 pound rated axles makes this the strongest trailer jet available.

Smart Counter™ hose footage meter is accurate to +/- 1%. Its large 2 1/4" brightly lit red LED display makes the footage readout visible up to 150 feet away. The Smart Counter™ is housed in a water and dust proof IP65 case.

Watertight Controls are contained in a weatherproof NEMA 4 control box.

Automatic Level Wind with Up/Down Action and a Pendant Control allows for safe, clean, and hands-free hose operation away from traffic.

Strong Hose Reel, built with 1/4" thick steel to withstand maximum working pressures without distortion. Includes 600 feet of 3/4" hose.

Smart Nozzles™ included as standard are the HW-70 high flow nozzle for moving debris and the Tri-Star nozzle to penetrate blockages and restore flow. These and other Smart Nozzles™ will match the jetter and application to give the most efficiency and highest productivity.

SuperPoly Water Tanks 350 Gallon single tanks provide an economical way of providing the water capacity you need and the durability the job demands. The 350 gallon SuperPoly Water Tank comes with a standard 5 year warranty
